

As a concerned Radio Amateur, I oppose the proposed granting of permission to other-than-amateur users to the 420-450 band. Foreign or domestic non-amateur users may temporarily procure cell phones or buy FCC approved devices for use during their stay in the US at very low cost. Further, I summarily reject any rationale for granting permission based on the "inability to enforce". That is the most lame and absurd of all reasons or rationale. Thank you for the opportunity to comment. K3HVG
